New Patient Consent Form (Missouri IDD Pilot Program)

Enable Dental has partnered with Missouri Coalition for Oral Health for the implementation of Teledentistry services for the IDD population. Program goals include improving oral health outcomes, providing oral health education, increasing access to dental care, and identifying and understanding community needs for at-home and portable dental services.

THE FIRST VISIT AND WHAT TO EXPECT

A new patient receives an initial comprehensive dental examination with oral cancer screening, x-rays, and cleaning with fluoride treatment. This program uses teledentistry as a pivotal part of the program. Any treatment recommendations will be communicated and sent via email/mail to the patient or healthcare guardian for approval. After a treatment plan is signed, the manager will coordinate with you to schedule the treatment visit.
